IN A SERIES OF SIX WEEKLY 
FREE PUBLIC LECTURES

ASHTEKAR FRONTIERS OF SCIENCE 
LECTURES IN THE EBERLY COLLEGE OF SCIENCE

THE AI REVOLUTION: 
USING ARTIFICIAL INTELLIGENCE FOR SOCIALLY RESPONSIBLE SCIENCE

Attendees of the lectures will hear from Penn State researchers who are working to advance science and society using cutting-edge technology in fields including agriculture, medicine, astronomy, bioinformatics, and public relations.

The lecture series was founded by Abhay Ashtekar, founding director of the Institute for Gravitation and the Cosmos and a member of the National Academy of Sciences. It owes its success to Barbara Kennedy, who presided over the series during its first 25 years, making it one of the most successful science outreach events in central Pennsylvania.
